RE: SSAC2019-02: Registration Data Services Query Reporting

Rod Rasmussen
Chair, ICANN Security and Stability Advisory Committee

Dear Rod,

Thank you for submitting [your letter on 3 May 2019](#) regarding the Registration Data Services Query Reporting. I want to express our appreciation for SSAC using the publicly available reporting information to help inform future policy-making decisions.

We recently shared your letter with the gTLD Registries Stakeholder Group (RySG) and had the opportunity to briefly discuss the issue with them. As a next step, we propose to facilitate a discussion between the SSAC and RySG in Marrakech at ICANN65. It is our hope that such a discussion will lead to a shared understanding of the issues and help to chart a path forward.

Please let us know if you would be amenable to a meeting between SSAC and the RySG during ICANN 65. If so, we will be happy to facilitate and to take care of the logistics.

Sincerely,

Russ Weinstein
