Not applicable

d. Were consultations with end users appropriate? Which groups were consulted? What were the nature and content of these consultations?:

Not applicable.

e. Who would endorse the introduction of this service? What were the nature and content of these consultations?:

The .gop domain name is being primarily marketed to individuals and groups that identify with the Republican Party. All 50 states in the United States use two character abbreviations for example the abbreviation, for example Ohio is OH.

Every state has an organized Republican State Party and offering two character domain names would allow these State Parties (except for those that correspond to a country code) use these domain names for websites. These groups have contacted us regarding using these domain names for their websites, and unfortunately we have to explain that they cannot use state abbreviations at the moment.

f. Who would object the introduction of this service? What were(or would be) the nature and content of these consultations?:

We are unaware of any objections to this service. We look forward to reviewing concerns raised during the public comment period.
